Division of Clinical Virology & Infectious Disease Surveillance  
258/A Bommasandra Industrial Area, Anekal Taluk, Bangalore - 560099

CAP ACCREDITED & NABH CERTIFIED

Report ID: VIR-PANEL-2026-3390  
Barcode: VIR\*0914\*33901

PRE-TRANSPLANT INFECTIOUS DISEASE SEROLOGY & NUCLEIC ACID SCREEN

|                     |                                    |                    |                                               |
|---------------------|------------------------------------|--------------------|-----------------------------------------------|
| Patient Name:       | Vikramaditya Sengupta              | Date of Exam:      | September 14, 2026                            |
| MRN / Patient ID:   | NH-BMT-2026-9012                   | Age / Gender:      | 49 Yrs / Male                                 |
| Blood Group & Rh:   | AB+ (Rh Positive)                  | Referring Doctor:  | Dr. Sharat Damodar, MD, DM (BMT)              |
| Clinical Diagnosis: | Myelodysplastic Syndrome (MDS-EB2) | Specimen / Source: | Serum & Plasma (Gold Top SST / Lavender EDTA) |

| Pathogen Marker      | Assay Method           | Result Value      | Cutoff Index   | Clinical Status            |
|----------------------|------------------------|-------------------|----------------|----------------------------|
| CMV IgG Antibody     | CLIA Chemiluminescence | 148.5 IU/mL       | >= 14.0 Pos    | Positive (Past Immunity)   |
| CMV IgM Antibody     | CLIA Chemiluminescence | 0.22 Index        | < 0.85 Neg     | Negative (No Active Flare) |
| EBV VCA IgG          | ELISA                  | 182.0 RU/mL       | >= 20.0 Pos    | Positive (Past Exposure)   |
| Hepatitis B sAg      | ECLIA 4th Gen          | 0.14 Non-reactive | < 0.90 Non-rec | Non-Reactive (Safe)        |
| Hepatitis C Antibody | CMIA Chemiflex         | 0.08 Non-reactive | < 1.0 Non-rec  | Non-Reactive (Safe)        |
| HIV-1/2 Ag/Ab Combo  | ECLIA 4th Gen          | 0.11 Non-reactive | < 0.90 Non-rec | Non-Reactive (Safe)        |

CLINICAL INTERPRETATION & RECOMMENDATIONS:

- Patient is CMV IgG Positive / CMV IgM Negative (latent seropositive carrier status).
- Matched donor serostatus recommended: CMV-positive preferred or CMV-matched to minimize primary infection risk.
- All viral safety screen markers (HIV, HBV, HCV, Syphilis) non-reactive with zero contraindications.
- Recommendation: Plan pre-emptive weekly CMV qPCR surveillance and initiate prophylactic Levalacyclovir.
