

FORTIS MEMORIAL RESEARCH INSTITUTE (FMRI)

Cellular Therapy & Bone Marrow Transplant Department
Sector 44, Opposite HUDA City Centre, Gurugram - 122002, Haryana

JCI ACCREDITED & NABH BMT ACCREDITED

Report ID: STR-CHIM-2026-1190
Barcode: STR*0914*11902

POST-TRANSPLANT STR MULTIPLEX CHIMERISM & ENGRAFTMENT ANALYSIS

Patient Name:	Rahul Kapoor	Date of Exam:	September 14, 2026
MRN / Patient ID:	FMRI-BMT-2026-5501	Age / Gender:	23 Yrs / Male
Blood Group & Rh:	A+ (Rh Positive)	Referring Doctor:	Dr. Rahul Bhargava, MD, DM (BMT)
Clinical Diagnosis:	Allogeneic BMT Day +60 for Acute Lymphoblastic Leukemia	Specimen / Source:	Peripheral Blood CD3+ / CD33+ Magnetic Sorted Cells

Cell Fraction	Donor % Call	Recipient % Call	STR Alleles Tested	Engraftment Status
Whole Peripheral Blood	98.8	1.2	16 Informative Loci	Complete Donor Chimerism
CD3+ T-Lymphocyte Fraction	97.4	2.6	16 Informative Loci	Robust T-Cell Engraftment
CD33+ Myeloid Fraction	100.0	0.0	16 Informative Loci	100% Full Donor Myeloid
CD19+ B-Cell Fraction	98.2	1.8	16 Informative Loci	Complete Donor B-Cell
D16S539 Locus Specific	99.1	0.9	Allele Peak Ratio	High Concordance Verified
TH01 Locus Specific	98.6	1.4	Allele Peak Ratio	High Concordance Verified

CLINICAL INTERPRETATION & RECOMMENDATIONS:

- Multiplex Short Tandem Repeat (STR) profiling confirms stable Full Donor Chimerism (> 98%).
- Complete myeloid donor chimerism (100.0%) and high donor T-cell chimerism (97.4%) on Day +60.
- Zero evidence of recipient hematopoietic relapse or graft failure.
- Recommendation: Maintain standard GVHD prophylaxis taper; recheck chimerism at Day +90.

Deepak Mehta, Senior Molecular Biologist
Medical Technologist / Pathologist

Dr. Vikas Dua, MD (Pediatric Hemato-Oncology)
Consultant Hematopathologist

Dr. Rahul Bhargava, MD, DM (Director of BMT)
