

AMRITA INSTITUTE OF MEDICAL SCIENCES (AIMS)

Department of Clinical Biochemistry & Transplant Hepatology
AIMS Ponekkara P.O., Kochi - 682041, Kerala

NABL ISO 15189 & NABH ACCREDITED

Report ID: LFT-AIMS-2026-4419
Barcode: LFT*0914*44193

COMPREHENSIVE HEPATIC FUNCTION PROFILE (PRE-BMT CONDITIONING CLEARANCE)

Patient Name:	Siddharth Menon	Date of Exam:	September 14, 2026
MRN / Patient ID:	AIMS-BMT-2026-0021	Age / Gender:	29 Yrs / Male
Blood Group & Rh:	A- (Rh Negative)	Referring Doctor:	Dr. Neeraj Sidharthan, MD, DM (Clinical Hematology)
Clinical Diagnosis:	Severe Aplastic Anemia (Pre-Transplant Organ Assessment)	Specimen / Source:	Serum (Clot Activator SST)

Liver Enzyme / Biomarker	Patient Result	Reference Range	Unit	Clinical Interpretation
Total Serum Bilirubin	0.85	0.20 - 1.20	mg/dL	Normal Bilirubin Excretion
Conjugated (Direct) Bilirubin	0.22	0.00 - 0.30	mg/dL	Normal Biliary Function
ALT / SGPT	28.0	10.0 - 45.0	U/L	Normal Hepatocyte Integrity
AST / SGOT	24.0	10.0 - 40.0	U/L	Normal Transaminase Activity
Alkaline Phosphatase (ALP)	74.0	40.0 - 125.0	U/L	Normal Canalicular Enzymes
Serum Albumin	4.2	3.5 - 5.0	g/dL	Preserved Hepatic Synthesis

CLINICAL INTERPRETATION & RECOMMENDATIONS:

- Hepatic enzymes, synthetic markers (albumin 4.2 g/dL), and bilirubin levels are entirely within normal limits.
- Zero biochemical evidence of viral, toxic, or drug-induced hepatopathy.
- Low baseline risk for Busulfan / Cyclophosphamide-induced hepatic Veno-Occlusive Disease / Sinusoidal Obstruction Syndrome.
- Recommendation: Cleared from hepatic standpoint for full-intensity conditioning chemotherapy.

Dr. Sajitha Nair, MD (Biochemistry)
Medical Technologist / Pathologist

Dr. Harish Kumar, MD, DM (Gastroenterology)
Consultant Hematopathologist

Dr. Prem Nair, Medical Director AIMS
Director of Cellular Therapy & BMT
