

KOSHIKA APEX CELLULAR THERAPY & BMT CENTRE

Clinical Diagnostic Division & Transplant Core  
StemBridge Technology Park, Electronic City, Bangalore - 560100

NABL ISO 15189 & FACT-JACIE AFFILIATED

Report ID: MED-KOSHIKA-2026-8836  
Barcode: KOSH\*0914\*88036

PRE-APHERESIS PERIPHERAL BLOOD CD34+ MOBILIZATION KINETIC ASSAY

|                     |                                                |                    |                                            |
|---------------------|------------------------------------------------|--------------------|--------------------------------------------|
| Patient Name:       | Clinical Patient #36 (Verified Cohort)         | Date of Exam:      | September 14, 2026                         |
| MRN / Patient ID:   | KOSH-BMT-2026-1036                             | Age / Gender:      | 56 Yrs / Female                            |
| Blood Group & Rh:   | A+                                             | Referring Doctor:  | Dr. Ramesh Sarin, MD, DM (Hemato-Oncology) |
| Clinical Diagnosis: | Hematologic Malignancy Protocol Assessment #36 | Specimen / Source: | Peripheral Blood EDTA                      |

| Test / Assay Target          | Observed Value | Reference Range        | Method / Assay       | Status / Interpretation |
|------------------------------|----------------|------------------------|----------------------|-------------------------|
| Peripheral Blood CD34+ Count | 68 cells/mcL   | >= 20 cells/mcL Target | Single Platform Flow | Optimal Mobilization    |
| Total White Blood Cell Count | 38,400 /mcL    | Leukocytosis Expected  | Automated Hemogram   | G-CSF Effect            |
| Absolute Neutrophil Count    | 32,800 /mcL    | Elevated               | Automated Hemogram   | G-CSF Mobilization      |
| Platelet Count               | 214,000 /mcL   | >= 100,000 Safe        | Automated Hemogram   | Safe for Apheresis      |

CLINICAL INTERPRETATION & RECOMMENDATIONS:

- Peripheral blood CD34+ count of 68/mcL surpasses collection threshold of >= 20 cells/mcL on Day 4 of G-CSF.
- Recommendation: Connect to apheresis machine immediately for large-volume leukoapheresis.
- All assay analytical internal and external controls passed standard quality criteria.
- Report electronically signed and validated under NABL laboratory oversight protocols.
